IRIS  CRISSP

what is the future direction?

How this work came about...

agencies using both CRISSP & IRIS
- could not consolidate data from both systems for reporting where outlets use different systems

agencies using IRIS only
- was not able to use it for case planning

agencies using CRISSP only
- could not get data out of the system

Discovery (Sep-Oct'12)
- systems profiling
- footprints and use
- current state

challenges
results statistically not significant

what we did... (Nov'12-Jan'13)
- collaborated with Centre for Excellence
- developed survey to collect data
- survey sent to member Agencies
- survey responses collated
- response rate was less than 20%

what do we do next
- consult & listen
- re-send survey
- canvas for your participation
- understand how you use both systems (as case management and or reporting?)

Why do we do that?
- opportunity for consultation with the sector
- work with the sector from systems perspectives
- make informed decisions about the future of both systems

thank you

Q&A

timeline we are working towards

mid Mar - send out survey
early Apr - submit response
late Apr- collate results
May - analyse results
Jun - July - develop options
